

***"Our Salvia plants with Jim's Green Label Rice Hull Ash™ are only getting three minutes of water daily and are growing as good with MORE LEAVES than the ones getting six minutes of watering"***

***Jose Macias***

**Variation of moisture for each material behaves as a straight line.**

**Slopes of each straight line indicates the rate of moisture that is evaporating from the soil bed.**

**Results show Jim's Green Label Rice Hull Ash™ (RHA) has the lowest moisture drying rate.**

**Therefore, Jim's Green Label Rice Hull Ash™ (RHA) has the highest moisture holding capability.**

**ORGANIC DISTRIBUTORS, INC**

***"For the record,  
I will again say the  
germination of plants  
is much easier  
and the water use  
is far less."***

***John Teas, Teas Nursery***

## SAVING THROUGH SUSTAINABILITY:

Our soil amendment is designed and engineered for the customer who is looking for a unique green, renewable, sustainable product. Capable of quick absorption of water in the soil, water is held and released as the plants require.

**Jim's Green Label™** has the ability to hold water in sandy soils as well as break up clay soils to allow for increased root depth and improved plant health and growth.

## TOP NOTES:

- ONE TIME APPLICATION
- STAYS IN SOIL INDEFINITELY
- INSTANT WETTING FOR QUICK ABSORPTION
- EXCELLENT WICKING PROPERTIES
- EASY APPLICATION & NO MAINTENANCE
- LESS WATERING, LESS HASSLE
- NO EXPANSION AFTER ADDING WATER

## BENEFITS OF RICE HULL ASH:

- SAVE UP TO 50% OR MORE OF ANNUAL WATER COST
- HIGHER SURVIVAL RATES IN UNIRRIGATED AREAS
- CREATES A MORE ROBUST AND HEALTHY LANDSCAPE
